Lightpath

Hosted Voice

The Feature-Rich, No-Maintenance Solution That Gives Your Business a Cost-Effective Competitive Edge

Lightpath Hosted Voice, combined with the Internet Voice Bundle, offers your business a complete IP voice solution that simplifies voice management and reduces cost. With Hosted Voice, you'll receive Cisco IP phones, generous calling plans and Internet bandwidth. And, you will enjoy an abundance of features making your voice experience richer, more sophisticated and better equipped for call management. You'll minimize capital expenses, lower overhead costs and reduce technical complexity, all in one complete package.

Hosted voice benefits at a glance:

- Work Smarter with Advanced Features: The included set of easy-to-use features, such as Find-Me-Follow-Me and Remote Office, will empower your employees to stay connected to customers and colleagues no matter where they are. And with your own provided softphone, you can make calls from your laptop making it easy to communicate from anywhere.

- Control Costs with Monthly Savings: Our flat-rate predictable billing, no up-front capital costs bundled with Voice and Internet access make it easier to manage your budget and your network. And with our multi-site option, you get free on-net calling between multiple locations.

- Rely on Easy Management: To help your business reduce costs and simplify voice-system management, all equipment is furnished, installed and maintained by Lightpath. Let us handle the complexities associated with maintaining your voice service, while your business benefits from the productivity enhancements of IP voice.

- Experience True Simplicity: The package includes State of the Art Cisco IP Phones, advanced voice features and end-to-end management. As your business grows, a simple software change is all it takes to upgrade with little or no downtime.
